ABOUT ME

The greatest advice ever given to me was to find a career that uses your mind and not your back. After years of working in multiple warehouse jobs where I was never challenged mentally, I heard about Nashville Software School from my brother, who is an alumnus. He warned me it was extremely hard and not for everyone. To me, the school sounded like something that would finally put me in a position to really find that career to use my mind

SKILLS

Tableau
Power BI
SQL (PostgreSQL)
Excel (Pivot tables, V-look up)
GitHub (Repos, Kanban Boards)
Crystal Reports
Python

PROFESSIONAL EXPERIENCE
